Governing Body Goes Paperless

Haysville, KS – The Haysville City Council will begin to see a change in the way they receive materials for their meeting. The Council, which receive paper copies of the documentation needed to prepare them for meetings, will now receive an electronic file that contains all of the same information. Councilmembers and the Mayor will view the file on laptops provided to them.

Council approved the paperless packet system after learning the cost savings and environmental benefits it would provide. In previous years at least 72 reams of paper were used to create packets. The Haysville City Code is another lengthy document that staff is looking into providing in electronic form to the Councilmembers and the Mayor.

The Haysville USD 261 Board of Education has been operating with a paperless system for their meetings and the response has been positive.
